

# GUIDELINES FOR GATHERING SAFELY AFTER VACCINATION

Spending time together in groups is important to everyone. However, gatherings can also impact the risk of contracting and spreading COVID-19. Is it possible to gather safely after being vaccinated?

Small gatherings likely represent minimal risk to fully vaccinated people. Medium or large-sized gatherings, especially those including unvaccinated people from multiple households, can increase the risk of COVID-19 transmission. Here are some guidelines and recommendations for gathering safely after being vaccinated:

● Vaccinated   
 ● Unvaccinated + Low Risk   
 ● Unvaccinated + High Risk

(High risk groups include, older adults, long-term care facility residents, people with underlying medical conditions, people at high risk for severe illness, people with disabilities, and more.)

STAY  
**SMART.**  
DO  
**YOUR PART.**

## FULLY VACCINATED PEOPLE CAN:

- Visit with other fully vaccinated people indoors without wearing masks or physical distancing.
- Visit with unvaccinated people from a single household who are at low risk for severe COVID-19 disease indoors without wearing masks or physical distancing.
- Refrain from quarantine and testing following a known exposure if asymptomatic
- Resume domestic travel and refrain from testing before or after travel or self-quarantine after travel.
- Refrain from testing before leaving the United States for international travel (unless required by the destination) and refrain from self-quarantine after arriving back in the United States.
